

Rapida 105 Specifications

Sheet size

Maximum	740 x 1,050 mm
Minimum	340 x 480 mm

Substrates

Standard	60 to approx. 350 gsm
Optional	up to approx. 1.2 mm thickness

Gripper margin	10 mm
-----------------------	-------

Maximum rated speed (depending on individual processing parameters, e.g. the inks and substrates used)

Standard	18,000 sph
8 printing units or more	15,000 sph

Pile heights

Feeder	1,300 mm
Delivery	1,200 mm

Plate size

Standard	795 x 1,060 mm
----------	----------------

Short makeready times

- Fully automatic plate changing (APC)
- Optimised and enhanced washing systems
- Efficient sheet guiding with newly designed air systems between the printing units and in the delivery
- Faster and even more comprehensive remote access to press settings from the console
- Disengaging of inking units from the press drive

Reduced waste

- Sheet gathering at the feeder
- Automatic pre-dampening
- Two-stage impression switching
- Simple separation of inking and dampening units
- Switchable differential drive for the dampening unit
- Ink train separation into 3 groups in case of stoppages

Enhanced productivity and efficiency
